24	Update "Royalty Paid to" attribute (Parts sold under Dart USA STC's)	N			
25					

Description / Action:

- DSI 9726 allows customers to lockwire their MS21920 clamps and forgo the 300 hour torque inspection on the clamps. This will prevent customers from having to remove the aircraft from the landing gear during the 300 hour inspection.
- Lockwiring the clamps is optional, customers who do not lockwire the clamps will have to check the clamp torque every 300 hours per the ICA.
- DSI 9726 should be added to existing D212-664-xxx & D412-664-xxx kits and sent to the customers who have requested the change.
- This change does not affect production at this time.

2/05/11, to update in off shore 1335816
